

# Enrich Your LMS with How-To Video Tutorials

## Integrating Video Training into Corporate Learning

SpeachMe is a video knowledge transfer solution that enables enterprises leveraging SAP, Oracle, Cornerstone OnDemand or any Learning Management System (LMS) to integrate How-To tutorials into their learning environment. With SpeachMe, organizations can enrich the overall corporate training experience through formal and informal video that augments face-to-face trainings.

The LMS is the center of employee learning at many organizations. These solutions are excellent repositories for documents, slide decks and other text-based content. SpeachMe is designed to help improve online learning by seamlessly merging video, documents, screen captures, hyperlinks and more to create microlearning content that can be viewed inside your learning management system.

SpeachMe and your Learning Management System are complementary technologies that when combined help improve online training at any organization.

### More Engaging Training Content

The LMS is an important platform for any eLearning program, unfortunately these tools do not allow training and development professionals to take full advantage of the most engaging format for online learning - the How-To video. As distracted employees demand more engaging training experiences, incorporating brief yet informative video presentations into corporate learning is a must. SpeachMe enables more effective learning in a video format optimized for information delivery and retention.

### Easy Video Creation

With the easy to use SpeachMe solution your subject matter experts can contribute to the organization's learning culture by sharing their expertise through video. With options to annotate and edit your video tutorials, the cloud-based product doesn't require downloads and works with any browser or operating system. For employees working in the field, the SpeachMe Studio app for smartphone or tablet allows for just-in-time knowledge sharing through quick mobile video capture.

### Embed Videos

Enrich your LMS by embedding video knowledge capsules from SpeachMe throughout your platform. Create video learning paths with snackable content that features polls, quizzes and other interactive elements to help improve engagement with the material. Power microlearning by allowing employees to watch, rate and share video presentations that are seamlessly embedded in any new page in your LMS.

### Searchable Video Library

SpeachMe serves as the central repository for all new and existing video inside your LMS. With powerful search, employees can find specific words, phrases or topics across the entire video library to quickly access the information they need in real-time. A solution specifically built for video, SpeachMe provides an optimal viewing experience on desktop or mobile without buffering or file type limitations. In addition, SpeachMe offers detailed viewer analytics to track course completion and engagement with the content.

With SpeechMe, organizations can improve operations and enhance training by integrating short video capsules into any Learning Management System. Empower resident experts to participate in the quick sharing of informal knowledge, while creating an on-demand library of digital media assets easily accessible from any device. SpeechMe helps transform your LMS into a dynamic video learning environment powered by skilled professionals.

### Capture
